

# ADVIT™ Studio

## Unified Platform for Developers and Data Scientists

ADVIT Studio is a containerized platform to Manage all your data, AI infrastructure & projects on a single platform curated for Developers & Data Scientists

Label → Train → Optimize → Deploy → Manage

## ADVIT™ Studio Features

### Deep Learning anywhere, anytime (Massive Scaling)

- Location agnostic
- Time agnostic
- AI Framework agnostic
- Hardware agnostic
- Higher Efficiency

### Licensable/Subscription based platform (Seamless Integration)

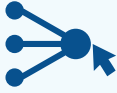

Platform focused on Developers and Data Scientists, so that they can develop effective DNN models for deploying on servers & edge devices.

### Accelerating AI (Centralization)

Accelerate Deep Learning innovations & deployment of DNN models with high throughput and lower latency

# ADVIT™ Studio Capabilities

Train DNN models  
on button clicks!

Fastest way to  
develop, track & deploy  
the DNN Models!

Self-hosted  
low-code  
developer platform

Data organization,  
statistics, &  
project Tracking

Pre-trained DNN models  
to speed up the  
Deep Learning  
Lifecycle

Dedicated  
support team

## Application Areas

DroneTech

AgTech

EdTech

RetailTech

Industry 4.0

HealthTech

And Many More...
