

# ADVIT™ Studio for Drone

Ready to use  
Pre-trained AI Models

Develop & manage the AI models  
faster using **ADVIT™ Studio**

## Custom AI Model Development

Custom AI model Development, training, optimization,  
and deployment pipeline for a state-of-the-art Drone technology.

# ADVIT™ Studio Features

- **Flexible** business and engagement models
- **Full AI Stack** with Developer Studio, Model Zoo & Model Services
- On-premise / On-cloud **white-labeled solution**
- Ready for **commercial deployment** with an efficient ADVIT™ Studio platform
- Unique, **low-code, modular, containerized** approach to automate AI model workflows

# ADVIT™ Studio Capabilities

Train DNN models on button clicks!

Fastest way to develop, track & deploy the DNN Models!

Self-hosted low-code developer platform

Data organization, statistics, & project Tracking

Pre-trained DNN models to speed up the Deep Learning Lifecycle

Dedicated support team

# ADVIT™ Studio USPs

- Data Management using APIs
- Model training on button clicks
- Real-time Analytics
- Automated Data Labeling
