

ADAPT AI

An AutoML Platform

By delivering a platform for **feature engineering, model validation, model tuning, model selection and deployment, machine learning interpretability, time-series, and automatic pipeline generation for model scoring**, ADAPT AI provides companies with an **extensible customizable ML platform** that addresses the needs of a variety of use cases for every enterprise in every industry.

ADAPT AI Features

Data Preparation + Cleaning

- Data Exploration w/ Pipelines
- Data Preprocessing
- Automated data type detection
- Missing data, handling & reidentification
- Synthetic data creation for better results
- Get statistics about distributions of your data

Algorithm Selection

- Automated ML task detection based on the data
- Understanding Feature Importance
- Hyperparameter Tuning
- Model Scoring & Iteration
- Model Optimization

Develop custom Dashboards on custom data points

Model Deployment

Time series Analysis

ADAPT AI Value Add To ML Process

- Identity & Access Management
- Licensable tool
- Easy Integration with client's software stack
- Data Ingestion APIs, Data organization & Tracking
- Building Actionable Scenarios
- Scalable solution
- Ongoing progress monitoring
- Cost-Effective (Reduce the ML cost by 2x)
- ML model deployment
 - Continuous model evaluation
 - Result analysis and ML model retraining
 - Easy deployment using Restful APIs
 - On-prem & Cloud deployment

ML model Lifecycle
